Profile

I'm a web and app developer with 5+ years of experience building fast, responsive websites, web apps and mobile apps for businesses in India and abroad. I work across React, Next.js, WordPress and Shopify, design in Figma and Canva, edit promo videos, and set up AI automations that answer, follow up and book for a business. I take a project from design to launch, with clean code and on-page SEO.

Employment

Mar 2025 – Present — Web Developer at Grupo Sineva

Websites, web apps and the AutistaAI mobile app (Android & iOS) for the group: gruposineva.com, sinevabrokerage.com and mypanditji.io.
